

Zaky Syi'ar Hunafa Nugroho

Junior Full Stack Developer | JavaScript Stack & DevOps | AI-Assisted Developer

Banten 42424 | +62 851 1103 9077 | hunafazsn@gmail.com

Professional summary

Full Stack Developer with over 3 years of hands-on experience designing and deploying web applications within the JavaScript ecosystem (React, Vue.js, Node.js). Proven ability to architect secure RESTful APIs, manage complex application state, and streamline deployments using Docker and CI/CD pipelines. Passionate about bridging high-performance front-ends with robust Back End architectures to deliver maintainable digital products.

Willing to relocate to: Bandung - Jakarta - Bogor

Work experience

Front End Developer

PT. Orion Media Solusi | Bandung

June 2021 to January 2022

- Built web interfaces using Vue 2 and Vuetify, and integrated interactive location mapping with Leaflet.
- Connected the Front End to RESTful APIs using Vuex and Vue Router.
- Implement form validation and role-based access control (User, Admin, Superadmin).
- Integrated Firebase Storage for file handling.
- Worked within a cross-functional team (UI/UX, PM, Back End) using Trello with Agile practices to deliver features on schedule.

Web Developer (Intern)

Timbang Nganggur | Remote

May 2021 to August 2021

- Built a responsive company profile web application using Laravel, Bootstrap, and MySQL.
- Fixed bugs in the authentication system and refactored parts of the legacy codebase to improve maintainability.

Education

Informatics Engineering (Bachelor)

UIN Sunan Gunung Djati | Bandung

August 2018 to July 2025

- GPA: 3.36/4.00
- Fields: Data Structure, Programming Language, Database System, Machine Learning, Software Development Life Cycle.

Skills

Linux

Express.js

REST API

No-SQL

Docker Compose

Cloudflare R2

MongoDB

Gin

PostgreSQL

PHP

Docker

Node.js

TypeScript

SQL

Next.js

Tailwind CSS

Go

HTML/CSS/JavaScript

MySQL

React.js

Python

HTTP

Nuxt.js

Languages

Inggris - Intermediate

Indonesia - Fluent

Certifications and licenses

DumbWays: DevOps Engineer

June 2026 to Present

Computer Networking, Linux, Firewall, SSH, Git, Nginx and Web Server

LinkedIn: Full-Stack JavaScript Development

March 2026 to Present

MongoDB, Node.js, React.js

HackerRank: JavaScript

March 2026 to Present

Functions, Currying, Hoisting, Scope, Inheritance, Events and Error Handling.

Publications

AdaMatsuri - Full Stack Event Discovery & Booking App

<https://adamatsuri.onrender.com>

Stacks: React, Vite, TypeScript, React Router, Tailwind CSS, Golang Gin, Docker

- Built a single-page application (SPA) focused on event discovery and ticket booking for the anime community.
- Developed a dynamic discovery interface featuring live search, categorical filtering, tag chips, and paginated results.
- Created a role-based access system with protected routes, enabling event organizers to publish and manage their listings through a dedicated dashboard.
- Implemented a seamless attendee reservation flow that authenticates users via phone number to generate booking codes.

BaruKerja - Full Stack Job Board Platform

<https://barukerja.vercel.app>

Stacks: Next.js, Tailwind CSS, Express.js, MongoDB, Cloudflare R2, Docker

- Developed a mobile-first job board application accommodating two distinct user journeys: job seekers and employers.
- Engineered a centralized data-fetching architecture using custom hooks to deduplicate reads and protect against stale responses.
- Implemented a server-side proxy layer to manage authentication and refresh token flows securely.
- Designed and built an independent RESTful API using Express.js and MongoDB to handle job logic, user accounts, and secure CV uploads via Cloudflare R2.

BacaKarya - Full Stack Reading & Writing Platform

<https://bacakarya.vercel.app>

Stacks: Nuxt 4, Vuetify, TypeScript, Pinia, Tiptap, SCSS

- Developed a responsive literary platform allowing users to publish stories, curate reading lists, and discover new content.
- Integrated the Tiptap rich-text editor, enabling authors to format and publish stories complete with cover images and metadata.
- Streamlined API integration by utilizing OpenAPI-generated interfaces to ensure strict type safety across the application.
- Managed global application state using Pinia to handle user sessions, reading list synchronization (bookshelf), and notifications.
- Enhanced user experience by implementing a custom Light/Dark theme toggle via Vuetify configuration.
