A Fullstack Developer specialized in the React and Next.js ecosystem to build modern, responsive, and scalable web applications. Skilled in bridging interactive front-ends with robust back-end architectures using TypeScript and Node.js. Highly committed to writing clean code and optimizing application performance to ensure a seamless user experience.

EXPERIENCE

Self-Employed | Fullstack Engineer | *January 2022 – Present*

- **Core Fullstack:** Built end-to-end web applications using Next.js, Node.js, Express.js, and MongoDB, focusing on rendering performance and clean architecture.
- **API & State Management:** Designed structured RESTful APIs documented with Swagger UI, and managed centralized state and data fetching via TanStack Query, Zustand, and Next Rewrite.
- **DevOps & Infrastructure:** Configured Docker containerization, CI/CD pipelines (GitHub Actions, Vercel, Netlify, Render), and Linux VM / Nginx staging environments.
- **Security & Monitoring:** Fortified system architecture using JWT Authentication, httpOnly cookies, password hashing, rate limiters, and system logging.

PT. Orion Media Solusi | Frontend Developer (Freelance) | *June 2021 – January 2022*

- **Frontend & Mapping:** Built pixel-perfect web interfaces using Vue 2 and Vuetify, and integrated interactive location mapping via Leaflet.
- **API, State & Security:** Integrated RESTful APIs with Vuex, Vue Router, form validation, 3-tier RBAC protection (User, Admin, Superadmin), and Firebase Storage.
- **Team Collaboration:** Collaborated within a cross-functional team (UI/UX, PM, Backend) via Agile Methodology to fulfill system requirements on schedule.

Timbang Nganggur | Web Developer (Internship) | *May 2021 – August 2021*

- **Fullstack Web Dev:** Developed a responsive company profile web application using Laravel, Bootstrap, and MySQL database management.
- **Maintenance & Debugging:** Refactored legacy code to improve long-term code maintainability and resolved critical bugs in the authentication system.

PROJECT

Reading Platform

Live Demo: hz-reading-platform.vercel.app

API Documentation: hz-reading-platform.onrender.com/api-docs

- **Architecture & Security:** Built a literacy platform using Next.js, Express.js, and MongoDB featuring secure authentication (JWT via httpOnly cookies), Zustand, and TanStack Query (with skeleton loading).
- **Core Platform Features:** Developed content management features (CRUD posts), reading history, bookmarking system, and user profile management.

- **DevOps & Microservices:** Managed isolated deployments via Docker (Vercel & Render) and prepared a FastAPI microservices migration for Collaborative Filtering & Naive Bayes recommendation features.

FORMAL EDUCATION

Universitas Islam Negeri Sunan Gunung Djati (2018 – 2025)

Bachelor of Engineering in Informatics/Computer Science (GPA 3.36/4.0)

INFORMAL EDUCATION

Coursera - Google Sertifikat IT Support (*October 2022*)

DumbWays - DevOps Engineer Certificate (*June 2026*)

LinkedIn - Full-Stack JavaScript Development (*March 2026*)

SKILL

Vue.js, React.js, Nuxt.js, Next.js, Node.js, Express.js, Laravel, FastAPI, JavaScript, TypeScript, PHP, Python, MongoDB, MySQL, GraphQL, RESTful API, Docker, CI/CD, GitHub Actions, Nginx, Linux, Zustand, TanStack Query, Bootstrap, Swagger (OpenAPI), JWT Authentication, Git, Agile Methodology, Machine Learning Algorithms (Collaborative Filtering, Naive Bayes), SDLC
